Bridgeborn Announces Formation of Subsidiary Company, TriLink Systems

TriLink to serve the International Power and Energy Marketplace with focus on Nuclear as well as Alternative and Renewable Energy Systems

Virginia Beach, VA – August 29th, 2008 – Bridgeborn, a leading systems design, engineering and integration company, today announced the formation of a subsidiary, TriLink Systems. Based in Millersville, Maryland, TriLink Systems is led by two industry veterans in the Power and Energy marketplace - Bob Kershner, CEO and Hal Paris, President. Together, Mr. Kershner and Mr. Paris have over 60+ years experience supporting customers in the International Marketplace including the Middle East, North Africa, the United States, as well as Eastern Bloc countries and the former Soviet Union.

"We're pleased to have formalized this relationship to create TriLink Systems with Mr. Kershner and Mr. Paris. As we look at the global demand for power and energy paired with grass roots movements towards alternative and renewable energy sources, we believe that this is a strategic decision that positions Bridgeborn and TriLink for both near and long term success," said Tim Ambrosino, Bridgeborn CEO. "This relationship with TriLink will also allow Bridgeborn to grow our international business and increase the user base of Bridgeworks Powered Solutions. Through existing customers such as Johnson and Johnson, USAID and the Emirates Simulation Academy, Bridgeborn solutions have already been deployed to over 35 countries."

"The projected growth in the international Power and Energy marketplace speaks to the tremendous opportunity and need to infuse new solutions to contemporary problems. By creating this relationship with Bridgeborn, TriLink can call upon Bridgeborn for high end IT services and solutions in support of our growing customer base," said Bob Kershner, TriLink CEO. "Additionally, Bridgeborn's unique data visualization capabilities and proven solutions such as their Training Delivery Platform address the education needs in this marketplace as the aging workforce begins to retire. Both Hal and I are pleased to be part of the Bridgeborn family and are confident that this relationship will be very successful for years to come."
